SAM

(self-adhesive waterproofing membrane)

SAM is a revolutionary new system based on elastic foam technology. The self-adhesive waterproofing membrane can be glued directly to wall and floor surfaces without using additional liquid sealing material. The top side is fleece-coated with an anti-bacterially film and offers an ideal base surface for every type of tile glue.

You should always prepare the walls and floors with a primer before installing the self-adhesive membrane. The walls and floors must be:

- Solid
- Dry
- Dust free

The following primed base surfaces can be sealed with Easy Seal SAM:

- Concrete
- Dry screed
- Plasterboard
- Cement screeds
- Existing ceramics (tiles)
- Wood

Most moisture-related damages result from an improper installation of liquid sealed water-proofing membranes, wall-to-floor transfers and drainage systems. The patented self-adhesive membrane avoids moisture damage by using fleece free impact bonding. The non woven zones interrupt the capillary movement of moisture and ensure a 100% water tightness.

USP:

- Time-saving installation (no drying time)
- Surface immediately tileable
- Suitable for all types of building chemicals
- No more liquid sealing necessary
- 100% watertight warranty - lifetime warranty
- Complete sets
- Antibacterial fleece coating to prevent mold formation
- High material elasticity prevents cracking
- Acoustic decoupling between finished surface and building construction
- Instantly high adhesive force (20 ton / sqft)
- Can be installed on Hotmop (after the Hotmop is cooling down).

Wet area - Seal System

Easy 2 Seal 2K Rapid

article code	description
E2S-2K-K	Set consists of: 1,5 kg for approx. 10 sqft (1 m ²)
E2S-2K-G	Set consists of: 4,0 kg for approx. 32 sqft (3 m ²)

Easy2Seal 2K is a 2-component, highly flexible, and reactively fast-setting seal system for reliable seal of various surfaces.

- Two components, fast-setting even at low temperatures
- Dries with almost no shrinking
- Weather-independent drying thanks to reactive setting
- Can be applied with brush, roller, sprayer, or towel.
Processing time approx. 45 minutes
- Can be surface ready after approx. 90 min – perfect for renovation
- Sets in the absence of air – important when seal tapes overlap
- Can be applied directly wet-on-wet
- Saves time thanks to rapid work sequence
- Suitable for indoor and outdoor use.

Application rate:

- E2S-2K-K** set consisting of: 3.3 lbs for approx. 10,7 sqft (1 m²)
- E2S-2K-G** set consisting of: 8.8 lbs for approx. 32 sqft (3 m²)
